PUBLIC NOTICE

The Tennessee Division of Air Pollution Control (TDAPC) has received requests for construction and/or modification of air contaminant sources as noted below. The proposed construction and/or modification is subject to part 1200-03-09-.01(1)(h) of the Tennessee Air Pollution Control Regulations, which requires a public notification and 30-day public comment period. Interested parties may express their comments and concerns in writing to Mrs. Michelle W. Owenby, Director, Division of Air Pollution Control, William R. Snodgrass Tennessee Tower, 312 Rosa L. Parks Avenue, 15th Floor, Nashville, Tennessee 37243 within thirty (30) days of the date of this notice. Questions concerning a source may be addressed to the assigned Division personnel at the same address or by calling 615-532-0554.

Any individuals with disabilities who wish to participate in these proceedings or to review these filings should contact the Tennessee Department of Environment and Conservation to discuss any auxiliary aids or services needed to facilitate such participation. Such initial contact may be in person, by writing, telephone, or other means, and should be made no less than ten (10) days prior to the hearing, or the date such party intends to review such filings, to allow time to provide such aid or service. Contact the Tennessee Department of Environment and Conservation ADA Coordinator, 2nd Floor, William R. Snodgrass Tennessee Tower, 312 Rosa L. Parks Avenue, Nashville, TN 37243, (866) 253-5827 (toll free) or (615) 532-0200. Hearing impaired callers may use the Tennessee Relay Service (1-800-848-0298).

The applicant is Wacker Polysilicon North America LLC with a mailing address of PO Box 446, Charleston, TN 37310. The facility address is 553Wacker Boulevard, Charleston, TN 37310. They seek to obtain air contaminant permits for following operations:

- a) Division Identification Number 06-0282-04/72476
This permit would be for the modification of a hydrochloric acid (HCl) generation operation. This operation consists of three (3) HCl tanks. Two (2) wet caustic scrubbers are used as pollution control. The proposed modification would increase the feed of chlorine to the source and also add two (2) more HCl tanks. There would be physical construction.
- b) Division Identification Number: 06-0282-23/72475
This permit would be for the construction of an amorphous fumed silica plant. The process will hydrolyze volatile chlorosilanes in an oxyhydrogen flame within a fluidized bed reactor. A wet scrubber will be used for emissions control. There would be physical construction.
- c) Division Identification Number 06-0282-25/72477
This permit would be for the construction of an amorphous fumed silica process material handling and packaging process. This source will consist of bagging machines, a central vacuum, and associated equipment. Fabric filters will be used for emissions control. There would be physical construction.

Regulated air contaminants would be emitted by these sources. Mr. B. Hall is the assigned Division person.
